PRETTY WOMEN ACCESSORIES

Counter Display Standard

Card arrangement & sorting guide — for every counter, every store

When a peg row or fixture holds more than one card, sort them in the order below, top to bottom and left to right. Follow the sequence exactly so every counter reads the same way to a customer, regardless of store. Use the Remarks column for the exact action to take at the shelf.

SORTING HIERARCHY — APPLY IN THIS ORDER

#	Sort by	Rule	Remarks — how to apply at the counter
1	**Card colour**	Group by the jewellery card's backing colour first.	Keep same-colour-card blocks together (e.g. all maroon cards as one block, all white cards as another). Never mix card colours within one peg row.
2	**Category**	ER → CH → BA → BR → AK → FR	Each category gets its own labelled column or panel on the fixture. Do not interleave two categories on the same row.
3	**Sub-category**	Within ER: Studs → Hanging/Danglers → Hoops → Ethnic → Value Pack	Finish one sub-category completely across the block before starting the next. Same logic applies within CH, BA, BR, AK and FR.
4	**Colour / tone**	Gold → Silver → Pearl → Multi-colour (light → dark)	Gold leads every group. Multi-colour cards are ordered light shades first, fading to dark shades last.
5	**Size**	Small → Big	Studs before drops, drops before statement pieces. Smallest card nearest the top or left edge of the block.
6	**Stone / material**	CZ stone → Crystal → Other articles (plain/metal)	Keep the same finish together within a size group so the shine reads consistently along the row.
7	**Store-wise**	Local layout, fixture size or footfall exceptions.	Store supervisor notes any deviation here — e.g. "Value Packs kept at eye-level, high walk-in demand." Log the reason, not just the change.

CATEGORY CODES

ER	CH	BA	BR	AK	FR
Earrings	Chains / Necklace	Bangles	Bracelet	Anklet	Finger Ring

GENERAL DISPLAY RULES

- Every card faces forward and hangs upright — straighten before opening and at midday.
- No visibly empty pegs in a customer-facing row: consolidate stock inward and pull replacements from the back store.
- Duplicate or backup cards of the same design stack directly behind the front card — never placed beside it in the row.
- Keep even spacing between hooks; do not compress a category to make room for another.
- New Arrivals signage sits at the top-left of its display block and is refreshed with each new drop.
- Wipe display panels, mirrors and cards at counter opening and once at midday for a polished finish.

Pin this standard at every counter. Store supervisors log local exceptions in the Remarks column above.
